

General Meeting, Thurs. March 18, 2010.

### **When and Where to Fish Our Great Trout Waters**

Do you have a section of your favourite river where you go at a special time of year? On a slow day, do you ever wonder where the other guys go? Ever liked to try that river you've heard about but didn't know where and when to fish it?

On Thurs. March 18, Bob Stiff and Jack Bramm will orchestrate a workshop evening on When and Where to Fish Our Great Trout Waters within an hour's drive from T.O.

Bob and Jack, armed with maps, charts and photographs, will review the main river watersheds in our area. With the participation of the members, what you've always wanted to know about the Grand, the Credit, the Humber and the Rouge and their tributaries will be revealed.

Audience participation will be very important. All members will be encouraged to share details about their favourite trout river or stream.

Don't miss this special meeting.
